Introduction

The National Tuberculosis (TB) Database is a centralized electronic information system developed to support the effective management, monitoring, and reporting of tuberculosis cases in Jamaica. The database serves as a critical tool for the National TB Programme, Regional Health Authorities (RHAs) and healthcare facilities by facilitating the collection, storage, analysis, and retrieval of TB-related data across the continuum of care.

Accurate and timely TB surveillance data are essential for strengthening programme performance, improving patient outcomes, supporting evidence-based decision-making, and fulfilling national and international reporting obligations. The database supports key programme functions including case registration, laboratory monitoring, treatment initiation and outcomes tracking, contact investigation, drug resistance monitoring and cohort analysis.

This User Manual was developed to provide standardized guidance for all authorized users of the Jamaica TB Database. It outlines the system's features, functions, and operational procedures to ensure consistent and accurate data entry, management and reporting practices. The manual also serves as a reference document for onboarding new users, reinforcing data quality standards and promoting the secure and confidential handling of patient information.

By adhering to the procedures and protocols outlined in this manual, users will contribute to the integrity, reliability, and overall effectiveness of Jamaica's TB surveillance and monitoring systems.

Purpose of the Manual

The purpose of this User Manual is to provide comprehensive guidance on the use and administration of the Jamaica TB Database. Specifically, the manual aims to:

1. Provide step-by-step instructions for accessing and navigating the database system.
2. Standardize procedures for data entry, validation, updating, and reporting.
3. Promote accurate, complete, and timely TB data management across all levels of the health system.
4. Strengthen data quality, confidentiality, and security practices in accordance with the Data Protection Act and public health standards.
5. Support healthcare workers, data clerks, surveillance officers, programme managers, and other authorized personnel in effectively performing their roles and responsibilities within the TB programme.
6. Facilitate the generation and utilization of data for patient management, programme monitoring, surveillance, research, and strategic decision-making.
7. Serve as a training and reference resource for both new and existing users of the database.

This manual should be used alongside relevant Ministry of Health and Wellness policies, TB programme guidelines, standard operating procedures, and data protection protocols governing the management of tuberculosis information in Jamaica.

User Responsibilities

Users are responsible for:

- Entering accurate patient information
- Updating records promptly
- Verifying information before saving
- Protecting patient confidentiality
- Reporting system issues to supervisors or the technical support team in the Strategic Information Component

Logging into the TB Database Register

Step 1: Open the Database

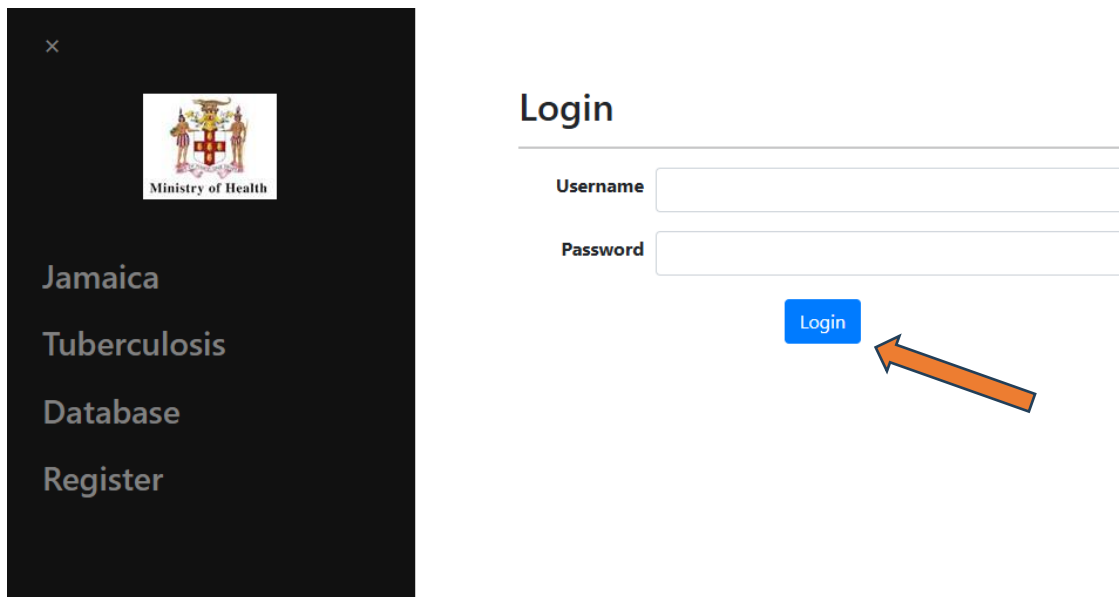

1. Open your internet browser.
2. Navigate to the TB Database link: <https://tb.moh.gov.jm/>

Please note that if you are unable to view the above page and was redirected to the Ministry of Health & Wellness webpage, this indicates that you do not have the TB security certificate installed on your device/system. Please contact the Strategic Information Component for further assistance.

Step 2: Enter the following login Information:

- Username
- Password

Select the **Login** button (or press the **ENTER** key on your keyboard).

The image shows a web application interface for the TB Database Register. On the left is a dark sidebar with a close button (X) at the top, the Ministry of Health logo, and the text 'Jamaica Tuberculosis Database Register'. The main content area is white and titled 'Login'. It features two input fields: 'Username' and 'Password'. Below these fields is a blue 'Login' button, which is highlighted by an orange arrow pointing towards it.

Figure 1: Login Page

Navigating the Dashboard

Once you are logged in, you will be viewing the dashboard in *Figure 2* below that consists of a blank search table with the last name, first name, pet name, middle name, date of birth, age, mother's name and tax registration number (TRN). This is related to *figures 3, 4 & 5*.

The Dashboard is the main page that will be displayed once you have successfully logged into the database.

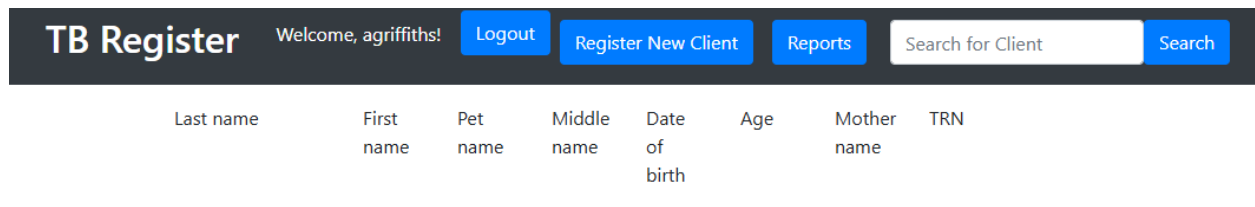

Figure 2: Screenshot of the Dashboard

Main Menu Options

The table below highlights the menu options on the dashboard and their respective functions.

Table 1: Key section/options on the dashboard

Menu	Function
Logout	Logging out of the TB database
Register New Client	Adding new TB patients
Reports	Generating monthly/quarterly reports
Search	Finding patient records

Searching for Existing Patient Records

Users can search using:

- First name
- Last name
- Middle name
- Tax registration number (TRN)

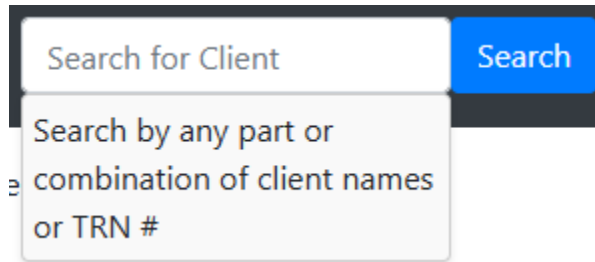

Figure 3: Searching for a Client.

Click on the **Search for Client** text box to search for existing patient before registering. This is to ensure there are no duplicated records in the TB database. If you had received no results on the screen when searching for a client, you can proceed in registering the client on the Register by clicking on the option, **Register New Client** (located at the top of the screen).

A screenshot of the "TB Register" web application. The top navigation bar includes the title "TB Register", a welcome message "Welcome, agriffiths!", and several buttons: "Logout", "Register New Client", "Reports", and a search section with a "Search for Client" input field and a "Search" button. Below the navigation bar is a table displaying client information. The table has columns for Last name, First name, Pet name, Middle name, Date of birth, Age, Mother name, and TRN. A single row of data is visible, with the first name "Temp" highlighted in blue.

Last name	First name	Pet name	Middle name	Date of birth	Age	Mother name	TRN
	Temp	None	None	March 11, 1984	41	None	546872536

Figure 4: Screenshot of page for client search/updating client records.

Registering a New TB Patient

The following information is required when registering a new TB patient:

- First Name
- Last Name
- Sex
- Date of Birth and/or Age

The screenshot shows the 'TB Register' application interface. At the top, there's a dark header with 'TB Register', a welcome message 'Welcome, agriffiths!', and navigation buttons: 'Logout1', 'Register New Client', and 'Reports'. A 'Search for Client' link is on the right. On the left, a teal sidebar lists menu items: 'Demographics', 'Registration and Visits', 'Investigation Results', 'Patient Status', and 'Medication'. The main content area is titled 'Create New Client' and contains a form labeled 'Add / Update Client'. The form has fields for 'Last name*', 'First name*', 'Middle name', 'Pet name', 'Sex at birth*' (a dropdown menu), 'Date of birth' (a date picker), 'Age*' (a text input with '0'), 'Occupation', 'Mother name', and 'TRN number'. A blue 'Save Form' button is located at the top right of the form.

Figure 5: Creating a new client to be added to the TB Register database.

This is another view of the 'Create New Client' form, showing the same layout as Figure 5. The 'Date of birth' field is now highlighted with a grey background, indicating it has been selected or is the current focus. The 'Age*' field still contains the value '0'. The 'Save Form' button remains at the top right of the form.

Figure 6: Another image of the Create New Client page.

After entering the date of birth, select the enter key or select the **Save Form** button located at the top left hand corner of the screen for the age to be calculated automatically.

Steps to Register a Patient/Client

1. Select **Register New Client**.
2. Complete all mandatory fields (such as Last Name, First Name, Sex at Birth and Age) and all other additional fields if necessary.
3. Review information carefully.
4. Click **Save Form**.

Data Quality Check Guidelines:

- ✓ Ensure all names are spelled correctly
- ✓ Verify dates before saving
- ✓ Check for duplicate records before entry

Adding/Updating Existing Records

The following steps should be followed when adding/updating an existing record:

1. Use the **Search for Client** button located at the top-right hand corner of the screen.
2. Enter the client's name (can be the entire first and/or last name or parts of their first and/or last name)
3. Select the blue highlighted name (under the Last Name heading) to view the existing client's record for editing.
4. Update the required information (and within the categories: Demographics, Registration and Visits, Investigation Results, Patient Status and Medication)
5. Click on **Save Form**.

Edit / Update Client				Save Form
Last name*	First name*	Middle name	Pet name	
Temp	Temp			
Sex at birth*	Date of birth	Age*	Occupation	
Male	March 11, 1984	41		
Mother name	TRN number			
	546872536			

Figure 7: Screenshot of updated patient information.

As indicated in figure 7, in this section of the page, you are allowed to enter the client's medical/personal information using the following categories: Demographics, Registration and Visits, Investigation Results, Patient Status and Medication. Table 2 lists each category, along with their sub-categories.

Table 2: Categories and sub-categories in the TB (Tuberculosis) Database Register

Category	Sub-Categories
Demographics	Addresses, Emergency Contacts, Social History, Incarcerations
Registration and Visits	Medical Facilities
Investigation Results	Mantoux, X-Ray, Smear, PCR, Culture for Mycobacterium TB, Culture for Bacteriology, Other
Patient Status	Clinical, Treatment Outcome, Co-morbidities
Medication	Drugs Prescribed, Drug Susceptibility Testing

The following steps should be followed when completing entry for each:

Demographics

Demographics

[Addresses](#) [Emergency_Contacts](#) [Social_History](#) [Incarcerations](#)

[Add New](#)

Date at address	Street_name	Parish	Community Telephone1
-----------------	-------------	--------	----------------------

No data found - Click 'Add New' to create new record

Figure 8: Screenshot of the demographic page.

Addresses

The following procedures must be followed when entering the address for a patient:

1. Open patient record.
2. Select **Demographics**.
3. Select **Emergency Contacts**.
4. Select the **Add New** button.
5. Enter:
 - Date at address (Calendar/Date selection) [**mandatory**]
 - Street name
 - Landmark
 - Parish
 - Community
 - Telephone cell1
 - Telephone cell2
 - Notes (if needed)
6. Click **Save**.

Notes

Figure 9: Screenshot of Add/Update Address Form

The required fields under the address section are **“Date at Address”** and **“Parish.”** For the **“Date at Address”** field, users must select a date using the calendar pop-up provided. However, **future dates are not accepted by the system** and will generate an error upon saving.

Emergency Contacts

The following procedures must be followed when entering emergency contact information for a patient:

1. Open patient record.
2. Select **Demographics**.
3. Select **Emergency Contacts**.

4. Select the **Add New** button.
5. Enter:
 - Date (Calendar/Date selection) **[mandatory]**
 - Relationship to patient
 - First name
 - Last Name
 - Age in years
 - Street name
 - Community1
 - Parish
 - Telephone cell
 - Telephone home
 - Telephone work
 - Notes (if needed)
6. Click **Save**

The screenshot shows a web browser window with the address bar displaying "tb.moh.gov.jm/client/create/emergencycontact/23/ - Google Chrome". The page title is "Add / Update Emergency Contacts". The form contains the following fields:

- Date***: A date input field.
- Relationship to patient***: A dropdown menu with a downward arrow.
- First name***: A text input field.
- Last name***: A text input field.
- Age in years**: A text input field.
- Street name**: A text input field.
- Community1**: A text input field.
- Parish***: A dropdown menu with a downward arrow.
- Telephone cell**: A text input field.
- Telephone home**: A text input field.
- Telephone work**: A text input field.
- Notes**: A large text area for additional information.

At the bottom of the form, there are two buttons: a blue "Save" button and a cyan "Cancel" button.

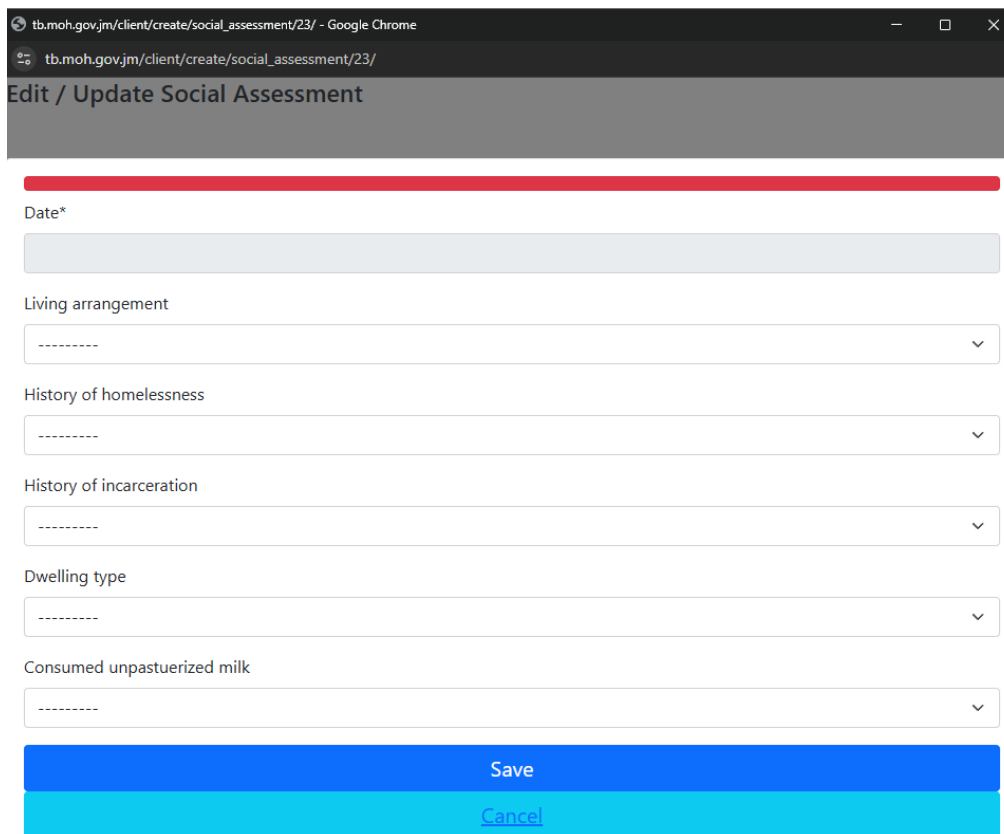

Figure 10: Screenshot for adding/updating Emergency Contacts

Please be advised that the mandatory fields are **Date**, **Relationship to patient**, **First Name**, **Last Name** and **Parish** (an indicated with the placement of an asterick).

Social History

The following procedures must be followed when entering information for a patient's social history:

1. Open patient record.
2. Select **Demographics**.
3. Select **Social History**.
4. Select the **Add New** button.
5. Enter:
 - Date (Calendar/Date selection) **[mandatory]**
 - Living arrangement
 - History of homelessness
 - History of incarceration
 - Dwelling type
 - Consumed unpasteurized milk
6. Click **Save**

The **Date** field is the only mandatory field in the Edit/Update Social Assessment. The other fields, which are highly recommended for updating, include: **Living arrangement**, **History of homelessness**, **History of incarceration**, **Dwelling type** and **Consumed unpasteurized milk**.

Incarcerations

The following procedures must be followed when entering incarceration information for a patient:

1. Open patient record.
2. Select **Demographics**.
3. Select **Incarcerations**.
4. Select the **Add New** button.
5. Enter:
 - Prison facility
 - Start date (Calendar/Date selection)

Drug Susceptibility Testing

The following procedures must be followed when entering the drug susceptibility testing information for a patient:

1. Open patient record.
2. Select **Medication**.
3. Select **Drug Susceptibility testing**.
4. Select the **Add New** button.
5. Enter the result date (Calendar/Date selection)
6. Enter information for following by selecting from the drop-down menu (where applicable):
 - Drug susceptibility testing
 - Rifampin resistance
 - Multidrug resistance

- Extremely drug resistance
 - Notes (if needed)
7. Click **Save**.

Important Notes

- Verify results against the laboratory register.
- Ensure dates are accurate.
- Do not leave mandatory fields blank.

Data Quality Guidelines

Users should routinely check for completeness, accuracy, timeliness and consistency of data entered. Table 4 defines each activity.

Table 4: Recommended data quality activities and their definitions

Data Quality Activity	Definition	Recommended Action	Responsible Individual/Entity
Completeness	The extent to which all required TB data elements, records, and reports are fully captured in the database without omissions.	• Monitor reporting rates from all facilities and parishes. • Generate monthly completeness reports and follow up on gaps. • Train staff on required TB indicators and documentation standards. • Conduct routine reconciliation between paper registers and the database.	• Strategic Information Component • TB Coordinator, Medical Officer of Health
Accuracy	The degree to which data recorded in the TB database correctly reflects the original source documents and actual patient or programme information.	• Conduct quarterly source document verification exercises. • Ensure that data collection tool and definitions are standardized	• TB Coordinator • HIV/STI/TB Unit
Timeliness	The extent to which TB data is entered, submitted, updated, and reported within the established reporting timelines.	• Establish clear reporting deadlines • Monitor submission timelines through dashboard tracking • Send reminders to facilities prior to reporting due dates	• Strategic Information Component & Medical Officers of Health

		• Conduct routine follow-up with late-reporting sites.	
Consistency	The degree to which TB data remains uniform and coherent across reporting periods, facilities, registers, and related information systems.	• Reconcile data between TB registers, laboratory records, and DHIS2/TB databases • Reinforce the use of standardized indicator definitions and reporting tools across all sites • Conduct trend analyses to identify unusual fluctuations. • Implement routine cross-checks between monthly, quarterly, and annual reports.	• Strategic Information Component & Medical Officers of Health, TB Coordinators

Best Practices

- ✓ Review entries before saving
- ✓ Update records immediately after receiving information
- ✓ Conduct weekly record reviews
- ✓ Verify laboratory results before entry

Confidentiality and Security

Confidentiality and security are critical components of TB data management, as the database contains sensitive personal and medical information about patients. Maintaining strong data protection measures helps to safeguard patient rights, strengthen public trust, and ensure compliance with national and international ethical standards.

Users must:

- Keep patient information confidential
- Never share passwords
- Log out after use
- Avoid printing unnecessary patient data
- Always alert administrators to remove access to individuals who are no longer directly affiliated with the programme

Troubleshooting

Table 5 outlines common trouble shooting problems and possible solutions.

Table 5: Common troubleshooting problems and solutions

Problem	Possible Cause	Solution
Record not saving	Missing mandatory fields	Complete required fields
System glitch	Internet connectivity issue	Report the issue to MIS focal point
Missing patient	Search criteria incorrect	Re-check details

Frequently Asked Questions

Q: What should I do if I entered incorrect information?

Edit the record immediately.

Q: Can I delete records?

No. Only administrators can delete records.

Q: How often should records be updated?

Records should be updated as soon as new information becomes available.

Support Contacts

Table 6 indicates the support personnel for the TB database in the HIV/STI/TB Unit.

WHAT IS **TUBERCULOSIS?**

Tuberculosis (TB) also known as consumption is caused by a type of bacteria that spreads through the air when infected people cough, sneeze or spit.

TUBERCULOSIS MAINLY AFFECTS

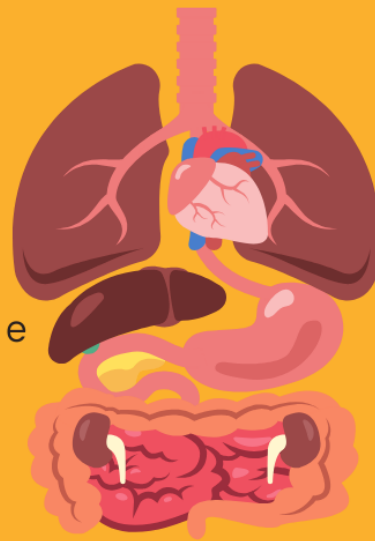

THE LUNGS

BUT CAN ALSO IMPACT
OTHER PARTS OF THE BODY

EARLY DETECTION SAVES LIVES

SYMPTOMS INCLUDE:

- Cough over 2 weeks
- Weight loss
- Fever
- Feeling tired all the time
- Chest Pain
- Night sweats
- Weakness

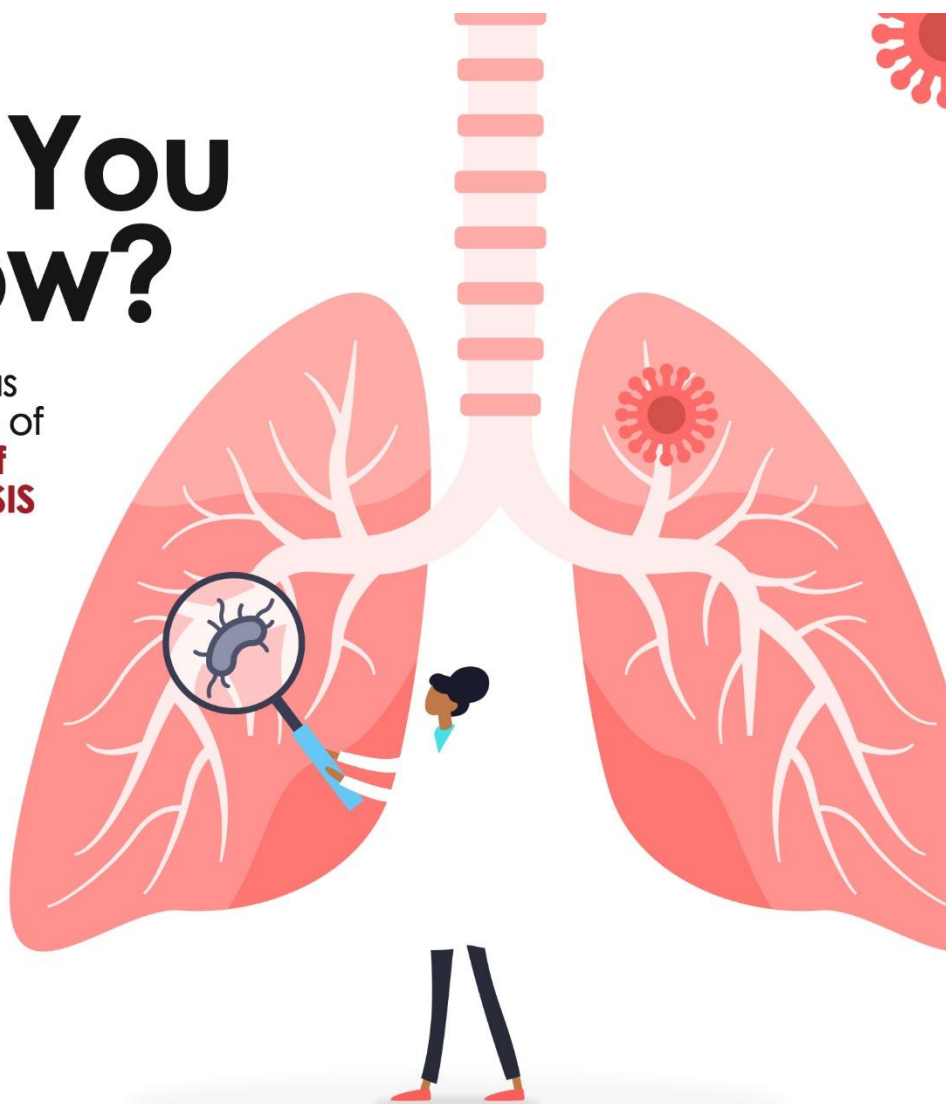

TUBERCULOSIS IS CURABLE!

Visit your nearest clinic if you
have a persistent cough, night
sweats, fever or weight loss

Did You Know?

Jamaica has
an average of
**109 cases of
TUBERCULOSIS**
per year.
